GLADIATOR CARGO NETS

GLADIATOR ACCESSORIES

Gladiator Cargo Nets offer various types of straps depending upon the style of ute or tray you have. The ASH-300 is the standard strap - used on most trays and vehicles. The ASH-370 is shorter and is used mostly on roof rack cages. The ADH-300 strap is designed to hook underneath the edge of alloy and steel trays. The AHK-300 is designed to be attached onto the round bar of vehicles. The keep stops the hook from coming off, even if strap becomes slack. All straps come in packs of 2.

Karabiners are also available and they come in packs of 10.
