

MAXSafe® Safety Signs and associated safety products, have been brought together by industry specialists with a view to simplifying your compliance process.

All signs are manufactured using quality substrates, ie: ACP, aluminium, corflute, polypropylene, vinyl and Australian manufactured Colorbond® steel.

All inks are UV stable and come with a guaranteed outdoor life. This ensures that they will handle almost any conditions on any site!

**All
Safety Signs
are designed
and manufactured
to comply or exceed
AS1319 and other
relevant Australian
standards.**

INDEX

Mandatory	4 - 7
Danger	8 - 15
Caution	16 - 18
Safety Cones & Sign Stands	19 - 21
Prohibition	22 - 24
Notice	25 - 26
First Aid	27 - 29
Fire	30 - 31
GHS Hazchem	32 - 33
Hazchem	34 - 37
Traffic	38 - 61
General	62 - 67
Entry, Exit & Luminous	68 - 69
Mining	70 - 73
Stickers, Floor Graphics & Stencils	74 - 77
Pipe Markers	80 - 82

Helping You to Understand Safety Signs

All Safety signs are designed to comply with the Australian Standard AS1319

A wide range of safety signage is available for you to choose from to ensure you can create a safe, well identified workplace. Our range of MAXSafe® Safety Signs is designed to meet Australian Standard 1319 which outlines specific parameters for Safety Signs in an occupational environment.

These signs are designed to regulate and control safety related behaviour, to warn of hazards and to provide emergency information including fire protection information.

Guide to Selecting The Right Sign Size

Selecting sign sizes is more than just choosing the size that best fits the space you have available. In order to comply with AS 1319, you must consider the environment, lighting and viewing distance.

To use, simply measure up your Viewing Distance and apply to the diagram. Remember, in poor lighting conditions, sign sizes will need to be increased by 50%

Choosing The Correct Sign for your Application

Prohibition Do Not Do

Shape & Colour:

Red Circle with diagonal line, black picture, text and white background.

Meaning:

You must not / Do not do / Stop

Danger Kill You

Shape & Colour:

“Danger” in white text featured in a red oval on top of the sign. Black text to specify hazard.

Meaning:

Potential hazard within a designated area. Caution/Risk of Danger Hazard ahead.

Warning Hurt You

Shape & Colour:

Rectangle or square with black triangle, picture and text on a yellow background.

Meaning:

Potential hazard within a designated area.

Fire

Shape & Colour

Rectangle or square. White symbol and/or text with red background.

Meaning:

Locates Fire Equipment or personnel.

Emergency Information

Shape & Colour:

Rectangle or square with White symbol and / or text with green background.

Meaning:

The safe way / Where to go in and emergency.

Mandatory Must Do

Shape & Colour:

Blue circle with white picture, black text and white background.

Meaning

You must do / carry out the action given by the sign.

GHS is the Globally Harmonised System of Classification and Labelling of Chemicals (GHS) that was introduced globally in January 2017.

The GHS system is designed to enhance the protection of human health and the environment, and does this by providing an international system of chemical hazard communication. This uniformity makes it easier and safer to recognize chemicals and the hazards worldwide.

Classification is the systematic identification of a chemical's hazards.

Classification is based on defined criteria for each hazard as set out in the GHS.

For example: A chemical's acute toxicity category is based on how much of the chemical is needed to poison someone. A chemical's flammability category is based on how easily the chemical will ignite.

Manufacturers and importers of chemicals that are supplied to workplaces are required by the model WHS Regulations to: Determine if a chemical they import or manufacture is hazardous. If the chemical is hazardous, correctly classify it according to the 3rd Revised Edition of the GHS.

The hazard classification of a chemical determines what information must be included on labels and SDS to comply with model WHS Regulations. If the classification of a hazardous chemical changes or new information comes to light, the label and SDS must be reviewed and revised.

UF505 Ultraflex Reflective Tape has proven itself on mine sites, industrial sites and harsh conditions all over the world. It is the product of choice for many leading companies, as it is a practical reflective solution that lasts.

The prismatic structure means the reflective tape is easy to cut and bend, and is resistant to high-pressure wash. Suitable for both indoor and outdoor use, our Ultraflex Reflective Tape has been designed specifically for applying to vehicles.

We can custom design your vehicle identification signs to suit most configurations.

CUSTOM PIPE MARKERS – ANY TEXT, ANY COLOUR!

The need to identify pipe content and flow direction using Accumax standard or customised, high visibility self-adhesive pipe marker labels is imperative these days. Simply peel the pipe marker label from the backing sheet and place in position on the pipe. Accumax pipe marker labels are manufactured from a durable, high-tac vinyl material using UV stable inks and are suitable for both indoor and outdoor use.

Our experienced team will assist you, from initial design (for custom pipe marker labels), through to proofs for your approval. We will then priority despatch them to you to avoid costly delays on big projects.

COLOUR IDENTIFICATION GUIDE

ACIDS / ALKALIS	WHITE TEXT ON LILAC
AIR	WHITE TEXT ON AQUA
COMMUNICATIONS	BLACK TEXT ON WHITE
ELECTRICAL	BLACK TEXT ON ORANGE
FIRE PROTECTION	WHITE TEXT ON SIGNAL RED
GASES	BLACK TEXT ON SAND
MEDICAL GASES	WHITE TEXT ON HARBOUR BLUE
MISCELLANEOUS	WHITE TEXT ON BLACK
OILS	WHITE TEXT ON GOLDEN TAN
STEAM	BLACK TEXT ON SILVER GREY
WATER	WHITE TEXT ON JADE
USER DEFINED	YOUR CHOICE ON YOUR CHOICE

Process to follow for “User Defined”

1. Decide on colour
2. Confirm the correct size required
3. Establish quantity needed
4. Email all details for a prompt quotation
